An Eleco plc Company

teamplan *express*

There are four elements in the Teamplan *Express* solution:

Asta Teamplan Software: This project and resource management software gives you complete visibility over all aspects of your projects including resource utilisation, project progress, performance and costs.

It enables you to plan and deliver projects successfully, control project costs and ensure your resources are used as effectively as possible.

Installation: An Asta engineer will visit your premises and install the Asta Teamplan enterprise software on your server.

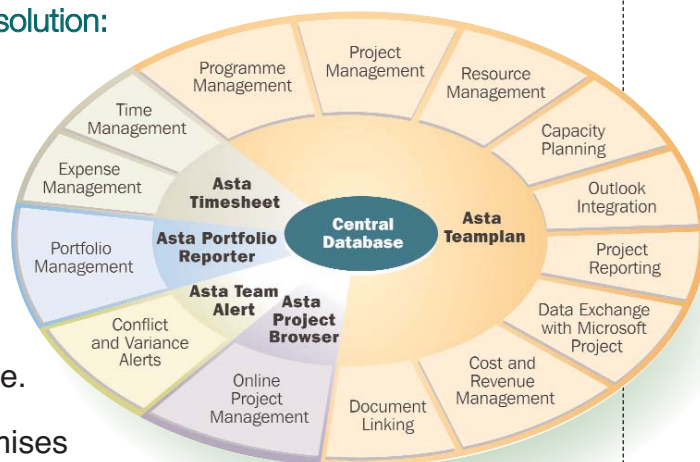

Training: Our experienced training consultants deliver hands-on training at your offices. The training covers both the software and also our proven implementation process, ensuring you get maximum benefits from Teamplan *Express*.

Technical Support: Our UK-based team provides technical support by phone and email.

Choose the Teamplan *Express* option that suits you – both are priced at £8,500 + VAT:

TEAMPLAN EXPRESS OPTION 1	TEAMPLAN EXPRESS OPTION 2
For use by up to 6 project, programme & resource managers	For use by up to 4 project, programme & resource managers and 10 timesheet users
2 Asta Teamplan concurrent licences	1 Asta Teamplan concurrent licence 1 Asta Teamplan named licence 10 Asta Timesheet licences
1 day installation	
2 days on-site training	
1 year technical support	

We estimate that 3 project managers can share one concurrent licence whereas named licences are assigned to an individual. Timesheet licences are used by team members to record time spent on each activity. The time can then be imported into the main project plans to update progress.
